Profile

Full-stack developer with **~9 months of production experience** as a Founding Engineer at a funded SaaS startup. Shipped 3 live web applications serving **100+ active users**, integrating GenAI, real-time systems, IoT telemetry, and payment gateways. Strong in the **MERN stack** with hands-on AWS deployment, API design, and Agile team leadership. Two-time hackathon winner with a track record of building and demoing products under pressure.

Work Experience

Founding Software Engineer Intern

Jul 2025 – Mar 2026

Devplex Technologies Pvt. Ltd.

Bhopal, MP

- Owned end-to-end development of **Devplex AI**, a SaaS platform that grew to **100+ active users** within months of launch
- Architected React.js frontend and Node.js/Express REST API backend from scratch; reduced page load time through component-level optimization and lazy loading
- Led a 3-person tech team — ran weekly code reviews, sprint planning, and enforced Git-based branching workflows
- Integrated the **LLM APIs** to power AI-driven website generation, the platform's core revenue feature
- Deployed and maintained the application on **AWS (EC2, S3)**, achieving 99%+ uptime across production releases
- Collaborated directly with co-founders on roadmap decisions, turning user feedback into prioritized sprint items

Projects

EVSync — EV Charging Ecosystem MERN, JWT, Razorpay, Leaflet, OSRM, ESP32 IoT [Code] [Live] 2025

- Built real-time charger socket telemetry using **ESP32, ACS712, ZMPT101B**, 1-channel relay, and SSD1306 OLED display — the hardware feeds live voltage/current data to the web dashboard
- Developed full-stack EV station discovery and route planning with interactive Leaflet maps, OSRM navigation, and Nominatim place autocomplete
- Designed Express/MongoDB backend with station and user APIs, admin controls, and booking-ready architecture
- Integrated Razorpay payments and JWT-based authentication for secure multi-role access

PlaceMateAI — AI Placement Prep Platform React, Node.js, MongoDB, OpenRouter, AWS Polly, Clerk [Code] [Live] 2026

- Built a full-stack AI interview prep platform covering mock interviews, group discussions, and coding rounds with real-time voice interaction
- Designed a voice AI pipeline using **Web Speech API (STT) + OpenRouter (Gemini) + AWS Polly (TTS)** for end-to-end voice-based interview sessions
- Implemented ATS resume analyzer and LinkedIn optimizer with detailed performance analytics dashboard
- Built subscription system with credit-based usage, Razorpay payments, and secure auth via **Clerk**

Devplex AI — AI Website Builder React, Node.js, MongoDB, AWS [Code] [Live]

2025

- Built an AI-powered SaaS platform that generates complete, deployment-ready websites from plain-text user prompts using the LLM
- Implemented role-based access control (RBAC), dynamic multi-page creation, and a Tailwind CSS-based responsive UI
- Optimized MongoDB queries and REST API response times to handle real concurrent user traffic at scale
